Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, it is unclear as to whether or not the first angular position and the second angular position are different from each other. For the purposes of examination, the examiner assumes that first angular position and the second angular position are in fact different from each other.

Additionally, claim 5 is contradictory. Claim 5 should recite –an angular position of greater than 0°. Claim 5 also recites “radial position” in the last line. This should be changed to –angular position--.

Art Unit: 3739

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Gibson (USPN 6,224,587 B1).

Art Unit: 3739

Regarding claim 1, Gibson discloses a steerable catheter comprising an elongated body member (16), a handle portion (24) connected to the proximal end of the elongated body member, at least one ablative element (14 at the distal tip), a steering means (12) operably attached to the proximal end of the elongate body member proximal to the ablative element and comprising a pull wire (29) slidably attached at a predetermined distance from the distal end of the steering means at a first angular position (many locations along the length of the elongated body member 16) with respect to the longitudinal axis of the elongated body member and fixedly attached at the distal end of the steering means at a second angular position (location of the connection of 29 with 26) with respect to the longitudinal axis of the elongated body member, see col. 3 and 4 and figures 1 and 4.

Response to Amendment

The examiner acknowledges the amendments to the specification, the drawings and the claims. The amendments to the specification and drawings overcome the previous objections. The amendments to the claims overcome the previously made rejections. However a new grounds for rejection has been made.

Art Unit: 3739

The new piece of art by Gibson (USPN 6,224,587 B1) was applied to claim 1. If the subject matter of claim 2 were to be incorporated into claim 1 and the first and second angular positions were recited as being different from each other, the rejection to claim 1 via the Gibson reference would be overcome.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
